

Lesson 4 - Practical Application Guide

□ How to Run the Project

```
cd D:\learnlaravel2025\lessons\lesson-04\practice-app
php artisan serve
```

Server will run on: `http://localhost:8000`

□ Available Routes and Pages

1. Basic Pages

- **GET** `/` - Home page (with Layout)
- **GET** `/about` - About us
- **GET** `/services` - Our services

2. Blade Examples

- **GET** `/blade/conditionals` - Conditional examples
- **GET** `/blade/loops` - Loop examples
- **GET** `/blade/components` - Component examples

3. Products

- **GET** `/products` - Product list (with Components)
- **GET** `/products/{id}` - Product details

4. Forms

- **GET** `/contact` - Contact form
 - **POST** `/contact` - Submit form
-

📁 Implemented Files

1. Main Layout

File `resources/views/layouts/app.blade.php`:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>@yield('title', 'My Site')</title>
  <style>
    body { font-family: Arial, sans-serif; margin: 0; padding: 0; }
    .container { max-width: 1200px; margin: 0 auto; padding: 20px; }
    nav { background: #667eea; padding: 15px; }
    nav a { color: white; margin: 0 10px; text-decoration: none; }
    footer { background: #333; color: white; text-align: center; padding: 20px;
margin-top: 50px; }
  </style>
  @stack('styles')
</head>
<body>
  @include('partials.navbar')

  <div class="container">
    @yield('content')
  </div>

  @include('partials.footer')

  @stack('scripts')
</body>
</html>
```

2. Components Created

- **Alert Component** - `resources/views/components/alert.blade.php`
- **Card Component** - `resources/views/components/card.blade.php`

3. Example Pages

- Conditionals demonstration
 - Loops with `$loop` variable
 - Products list with components
 - Contact form with validation
-

□ What We Learned

1. Layouts

- □ Create main Layout with `@extends`
- □ Use `@section` and `@yield`
- □ `@stack` and `@push` for CSS/JS

2. Components

- □ Create reusable Components
- □ Use `@props` for properties
- □ `{{ $slot }}` for content

3. Conditionals & Loops

- □ `@if`, `@foreach`, `@forelse`
- □ Use `$loop` for iteration info
- □ `@auth`, `@guest` for user checks

4. Forms

- □ `@csrf` for protection
 - □ `@error` for validation errors
 - □ `old()` to retain values
-

□ Useful Commands

```
# Create Component
php artisan make:component Alert

# Create Component with Class
php artisan make:component Button --class

# Clear Views cache
php artisan view:clear

# Start server
php artisan serve
```

□ Testing Pages

1. □ <http://localhost:8000/> - Home page
2. □ <http://localhost:8000/blade/conditionals> - Conditionals
3. □ <http://localhost:8000/blade/loops> - Loops
4. □ <http://localhost:8000/products> - Products
5. □ <http://localhost:8000/contact> - Contact form

□ Tips

1. **Use Layouts** for reusing structure
 2. **Components** are useful for repeated elements
 3. **@forelse** is better than **@foreach** for potentially empty lists
 4. **Don't forget @csrf** in all forms
 5. **Use @error** to display error messages
-

□ Next Step

After completing this lesson, you're ready for:

Lesson 5: Databases and Migrations

- Creating databases
- Migrations
- Schema Builder

Happy Learning! □
