

Lesson 4 - Quick Reference Card

▣ Displaying Data

```
{{-- Safe display (with Escaping) --}}
{{ $variable }}
```

```
{{-- Raw display (without Escaping) - Dangerous --}}
{!! $htmlContent !!}
```

```
{{-- Default value --}}
{{ $name ?? 'Guest' }}
```

```
{{-- Blade comment --}}
{{-- This comment won't appear --}}
```

▣ Conditionals

```
@if($condition)
    Content
@endif

@elseif($other)
    Other content
@endif

@else
    Alternative content
@endif

@unless($condition)
    Opposite of if
@endunless

@isset($var)
    If exists
@endisset

@empty($var)
    If empty
@endempty

@auth
    Logged in
@endauth
```

```
@endauth

@guest
    Guest
@endguest
```

■ Loops

```
@foreach($items as $item)
    {{ $item->name }}
@endforeach

@forelse($items as $item)
    {{ $item->name }}
@empty
    No items
@endforelse

@for($i = 0; $i < 10; $i++)
    {{ $i }}
@endfor

@while($condition)
    Content
@endwhile
```

\$loop Variable

```
$loop->index      {{-- 0, 1, 2... --}}
$loop->iteration   {{-- 1, 2, 3... --}}
$loop->first      {{-- First item? --}}
$loop->last       {{-- Last item? --}}
$loop->count      {{-- Total count --}}
$loop->remaining  {{-- Remaining --}}
```

▣ Layouts

```
{{-- Layout: resources/views/layouts/app.blade.php --}}
<!DOCTYPE html>
<html>
<head>
    <title>@yield('title')</title>
    @stack('styles')
</head>
<body>
    @yield('content')
    @stack('scripts')
</body>
</html>

{{-- Page --}}
@extends('layouts.app')

@section('title', 'Page Title')

@section('content')
    <h1>Content</h1>
@endsection

@push('scripts')
    <script>...</script>
@endpush
```

▣ Components

```
{{-- Define Component: resources/views/components/alert.blade.php --}}
@props(['type' => 'info'])

<div class="alert alert-{{ $type }}">
    {{ $slot }}
</div>

{{-- Usage --}}
<x-alert type="success">Success!</x-alert>

{{-- Multiple Slots --}}
<x-modal title="Title">
```

Main content

```
<x-slot name="footer">
  Footer content
</x-slot>
</x-modal>
```

▣ Includes

```
@include('partials.header')

@include('partials.alert', ['type' => 'success'])

@includeIf('partials.sidebar')

@includeWhen($condition, 'partials.menu')

@includeUnless($condition, 'partials.guest')

@includeFirst(['custom', 'default'])
```

▣ Forms

```
<form method="POST" action="/posts">
  @csrf

  {{-- PUT/DELETE Method --}}
  @method('PUT')

  <input type="text" name="title" value="{{ old('title') }}">

  @error('title')
    <span>{{ $message }}</span>
  @enderror

  <button>Submit</button>
</form>
```

▣ Passing Data

```
// From Controller
return view('home', compact('users', 'posts'));
return view('home', ['users' => $users]);
return view('home')->with('title', 'Title');

// View Composer (in AppServiceProvider)
View::composer('dashboard', function ($view) {
    $view->with('stats', Stats::get());
});

// Global sharing
View::share('appName', 'My App');
```

▣ Useful Directives

```
@switch($status)
    @case('active')
        Active
    @break
    @default
        Inactive
@endswitch

@php
    $total = 100;
@endphp

@verbatim
    {{ Won't be processed }}
@endverbatim

@json($array)

@continue
@break
```
